

AdvNLP - Study Guide

Lectures by Daniele Puccinelli

June 2026

1 Lecture 3 - Encoders

Study 2-15 and 17-36. Please skip 16 and 27-40.

2 Lecture 4 - Classification

We skipped 2-17. We spent lots of time on 18-26; please pay particular attention to the separate PDF with a **quantitative example of text classification performance evaluation**. We skipped 27-35; there will not be specific questions about Logistic Regression and SVM on the final exam. Slides 36-41 are relevant.

3 Lecture 5 - Tagging and Parsing

The whole slideset is relevant. Pay special attention to slide 33 (**UAS/LAS**).

4 Lecture 7 - Alignment - RLHF

The whole slideset is relevant. Pay special attention to the quantitative examples (31-32 and 47-48).

5 Lecture 8 - Alignment - DPO

The whole slideset is relevant. Particularly important slides: 20-21, 29-31.

6 Lecture 10 - Benchmarking

Slides 4-8, 31-33, 35-36 are not directly relevant for the exam.

7 Lecture 14 - Text to Speech

We skipped 9, 11, 18. We went very fast on 19-21; we skipped the mathematical details and only provided some basic intuition. We completely skipped 42-48. 49-51 are relevant.
